Path Builder allows instructors to guide students through Units and/or content items found in their course.

1. In your course click “Course Admin.”

2. On the Course Admin page, click “Path Builder.”

3. To expand the week click the expand icon.
4. To set the trigger, click the Condition dropdown menu. Within that menu select the item that will trigger the current item to become available. For example, Week 1 Discussion will trigger the “Short Essay” to become available.

5. Next select “Submit,” “Respond,” or “Earn Points.” In this example “Respond” is selected, because it is a discussion.
6. Since the discussion is the trigger for this example, you will want to select “All Topics” for the next item to open. Students will have to respond to all topics for the next item to become available.

7. For the Quiz item, the Short Essay will be the trigger to release the Quiz. In the dropdown menu select “Week 1: Short Essay” for the trigger.
8. Next select “Submit.” This will allow the Quiz to open upon the submission of the Short Essay.

9. Once you have finished all the items for each week, click “Save Changes.” You have now set up the Path Builder.
